## 1. Introduction

Launched in 2018, Kao Data develop and operate advanced data centres for high performance computing. From our hyperscale inspired campus in the heart of the UK's Innovation Corridor between London and Cambridge to our facilities in east and west of London, we provide HPC, cloud, AI, and enterprise customers with a world-class home for their compute.

## 2. Objectives

The purpose of this Environmental and Energy Policy is to outline the management direction and confirm its commitment to meeting the environmental standards and energy performance expected by our customers in the delivery of our services. This policy statement provides the framework for setting and reviewing our objectives and energy targets. Kao Data's senior management are committed to;

- Maintaining an Integrated Management System designed that meets the requirements of the ISO 14001 and ISO 50001 international standards
- Ensuring the availability of information and necessary resources to achieve our objectives and energy targets.
- The fulfilment of our applicable legal, regulatory, and other applicable compliance obligations related to the environment, energy efficiency, energy use and energy consumption.
- Protecting the environment and the prevention of pollution, reducing waste and the consumption of natural resources.
- The procurement of energy efficient products and services that impacts energy performance.
- Considering energy performance improvements in design activities.
- Ensuring the Environmental and Energy Policy and supporting objectives and targets are understood by all Kao Data staff and contractors; and to provide relevant skills training, induction and environmental and energy awareness training as required.
- Ensuring that environmental and energy issues are considered in planning and managing our data centre operations to be environmentally efficient.
- Complying with the requirements of the Integrated Management System and continually improving the effectiveness of the Integrated Management System to enhance environmental and energy performance.

## 3. Responsibilities

All Kao Data staff and contractors are required to comply with the requirements of the Integrated Management System and to contribute actively to its continual improvement.

This Policy is reviewed to ensure its ongoing suitability by the senior management team who recommend amendments and updates to the policy as part of the continual service improvement process.

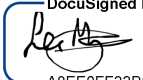

Failure to comply with company policies and procedures will result in disciplinary action where necessary.

## 4. Review

A review of this policy and its continued applicability will be carried out on an Annual Basis.
